NITTONDE BANDETS INNEHÅLL

		Sid.
1.	KIERKEGAARD, P., On the crystal structure of $(MoO_2)_2P_2O_7$	1– 14
2.	VINK, H., Investigations on solute permeation through osmotic membranes	15– 33
3.	BERECKI-BIEDERMANN, C., Studies on solutions containing rhodium in the oxidation state 5, Rh(V)	35– 49
4.	KIERKEGAARD, P., Studies on some oxide compounds of phosphorus and molybdenum or wolfram	51– 74
5.	BERGSON, G., Synthesis of 4-(aminomethyl)-1-thia-2-selena-cyclopentane	75– 81
6.	SERCK-HANSSEN, K., Optically active higher aliphatic hydroxy-compounds. IV. Stereospecific synthesis of 2,4-alkanediols by a method involving a novel reductive ring-closure reaction	83– 96
7.	EHRENBERG, A., Electron spin resonance studies on flavin free radicals	97–117
8.	EHRENBERG, A., Electron spin resonance absorption by some hemoproteins	119–128
9.	ENGSTRÖM, L., Formation of a phosphorylenzyme during hydrolysis of ^{32}P-labelled glucose 6-phosphate from calf-intestinal mucosa and *Escherichia coli*	129–140
10.	JANSSON, G., Respiration and phosphorylation in water-sensitive barley	141–148
11.	JANSSON, G., A study on 3-indoleacetic acid in barley seeds in relation to water-sensitivity	149–159
12.	JANSSON, G., Some properties of a substance in barley seeds which induces a lag period in the enzymic oxidation of 3-indoleacetic acid	161–171
13.	BERGSON, G. and ANDERSSON, B., Synthesis of 3-(aminomethyl)-1,2-dithiolane. Including a discussion of its ultraviolet spectrum	173–180
14.	BERGSON, G., The electronic structure of 1,2-dithietene, 1,2-dithia-4-cyclopentene-3-thione and the 1,2-dithiolium cation	181–194
15.	BERGSON, G., A contribution to the chemistry of the 1,2-diselenolane ring-system	195–214
16.	BERGSON, G. and WOLD, S., A note on the structure and absorption spectra of aromatic thiolselenenates	215–222
17.	ANDERSSON, L. H., Studies in the determination of silica. IV. Experiments on the reduction of silicomolybdate. Interference from some anions and cations	223–233
18.	ANDERSSON, L. H., Studies in the determination of silica. V. Spectrophotometric determination of silica as silicomolybdic acid in strongly acid solution	235–242
19.	ANDERSSON, L. H., Studies in the determination of silica. VI. Separation of some anions and cations from silicic acid by ion exchange	243–248
20.	ANDERSSON, L. H., Studies in the determination of silica. VII. Some experiments with the gravimetric silica determination	249–256
21.	ANDERSSON, L. H., Studies in the spectrophotometric and gravimetric determination of silica	257–264
22.	BERGSON, G., Some remarks on the energetics of cyclic disulphides	265–270
23.	AURIVILLIUS, B. and JONSSON, I., The crystal structure of the monoclinic modification of $BiOHCrO_4$	271–290

Sid.

24. von Euler, H. und Hasselquist, H., Oligo-Nukleotide durch Spaltungen und Synthese 291–296
25. von Euler, H. und Hasselquist, H., Versuche zur Synthese von Oligo-Nukleotiden. II 297–301
26. De Hevesy, G. and Lockner, D., Iron metabolism in health and in the neoplastic state 303–385
27. Hedbom, A., The microbiological assay of vitamin B_{12} in samples of liver tissue 387–403
28. Andersson, C.-O., Ryhage, R., Ställberg-Stenhagen, Stina and Stenhagen, E., Mass spectrometric studies. IX. Methyl and ethyl esters of some aliphatic α-amino acids 405–416
29. Andersson, C.-O., Ryhage, R. and Stenhagen, E., Mass spectrometric studies. X. Methyl and ethyl esters of N-acetylamino acids 417–434
30. Marinder, B.-O., The crystal structure of niobium dioxide 435–446
31. Lindstedt, S. and Lindstedt, G., Decarboxylation of the diasterisomers of 5-hydroxylysine and isolation of (–)-2-hydroxycadaverine 447–450
32. Wallén, P. B., Studies on the purification of human plasminogen. I. The preparation of a partially purified human plasminogen with a low spontaneous proteolytic activity 451–468
33. Wallén, P. B., Studies on the purification of human plasminogen. II. Further purification of human plasminogen on cellulose ion exchangers and by means of gel filtration on Sephadex 469–482
34. Gronowitz, S., Sörlin, G., Gestblom, B. and Hoffman, R. A., Proton magnetic resonance of furans. Chemical shifts and substituent effects . 483–497
35. Östman, B., Hydrogen isotope effect and orientation in nitration of thiophene 499–514
36. Gronowitz, S. and Sörlin, G., On the preparation of 3-substituted furans 515–525
37. Östman, B., Note on orientation in the nitration of 2-nitrothiophene . . 527–529
38. Vink, H., Fractionation of high polymers by diffusion through membranes 531–548
39. Nilsson, A., Demethylation of the plant estrogen formononetin to daidzein in rumen fluid 549–550
40. Wideqvist, S., The hydrolysis of α-bromophenylacetic acid 551–558
41. Zdansky, G., The synthesis of selenomethionine 559–562
42. Bergström, S., Dressler, F., Ryhage, R., Samuelsson, B. and Sjövall, J., The isolation of two further prostaglandins from sheep prostate glands. Prostaglandin and related factors 8 563–567
43. Forsén, S. and Nilsson, M., Spectroscopic studies on enols. Part 5. Spin coupling effects in the NMR spectra of hydroxymethylene and anilinomethylene compounds 569–576
